

CLEVER AND EFFICIENT!

Murrelektronik's cable entry systems are the perfect solution to route cables or cordsets systematically and precisely in your system.

The MKDP cable entry panel is an entry system for cables and compressed air hoses that secures the cables in place and is often used in systems and machine building. The compact plates are an excellent choice for a quick and cable-friendly installation which requires many cordsets or hoses to be used.

For routing pre-wired cables, the MKDL/E cable entry bracket is the right solution. This modular system makes it possible to quickly and easily enter up to 20 cables into cabinets or terminal boxes.

The cut-outs of both systems match the connectors from Harting and Wieland.

SECURE STRAIN RELIEF

1 MKDP STANDS FOR...

- Routing open-ended cables
- High Density
- Compact Design
- IP65 rating
- No tools required with locking hooks
- Automatically sealed, no extra steps necessary
- Suitable for size 24 standard cutouts

2 MKDL STANDS FOR...

- Routing pre-wired cables
- Quick installation, cable routing without any problems
- High Density
- IP54 rating
- Modular inserts ensure highest flexibility
- Suitable for size 16 and 24 standard cutouts
